PRESENTATION OF TASK MAPPING

- In order to gain a more thorough understanding of how the work of the different DGs relates to the 77 tasks identified for the task-ranking survey, the Commission's Digital Transformation team has mapped each page of every site listed in the Europa Inventory against one or more of the 77 tasks.

- This exhaustive mapping exercise will help us:
  - to assess how well the Commission's existing digital presence serves the identified tasks
  - to identify which content is related to each task (in cases where content can be edited/rewritten with the relevant DGs)
  - to engage DGs in the co-creation of content for the Commission's future web presence, which will be built on a common architecture (i.e. task-based, not DG-based): DGs with a stake in the task(s) being worked upon will be invited to participate in work at all stages of the process, including co-creation of content.

- We are aware that a DG with a large web presence may have more pages mapped to a task than a DG with a small presence, without necessarily having a bigger stake in the task. To compensate, we weighted the task-mapping results by multiplying a DG's 'absolute stake' in a task (DG pages related to task divided by total number of pages related to task) by the 'absolute weight' of the task on its web presence (DG pages related to task divided by total number of pages on DG's web presence).
