What is your overall feeling about the draft new Work Programme 2020-2024?

Enthousiastic, we are almost there.

 9 %

Positive, looking forward to further develop it further on this basis.

 70 %

Neutral

 13 %

I don't like it at all

 0 %

I haven't read it yet.

Information topics (1/2)

0 4 5

If it is not possible to have a face to face MIG meeting in June, would you prefer to have a virtual meeting in June or to postpone the meeting till after summer?

Virtual MIG meeting in June

Face to face MIG meeting after summer

How do you feel about a virtual INSPIRE conference in June?

(1/2)

This makes me happy, I will attend as much sessions a possible.

Looking forward to all sessions and plenaries..

Looking forward to it, specifically to the plenaries.

Looking forward to it, specifically to the more technical sessions and workshops.

Looking forward to it, specifically to the more thematic sessions.

How do you feel about a virtual INSPIRE conference in June?
(2/2)

I am not really cold or hot about it. I might attend limited sessions or plenaries.

I couldn't care less.

Feedback on the scope of the work area 1 "Towards a common implementation landing zone" (1/3)

0 4 5

What goals should working area 1 be working towards after 2020?

(1/2)

Further simplification

Alignment of implementation approaches between Member States

Avoidance of parallel infrastructures

Increased data availability

Improved usability

Feedback on the scope of the work area 1 "Towards a common implementation landing zone" (1/3)

0 4 5

What goals should working area 1 be working towards after 2020?

(2/2)

Adaptation to new technologies and standards

36 %

Implementation will be completed, i.e. no need for further actions on implementation support

7 %

Feedback on the scope of the work area 1 "Towards a common implementation landing zone" (2/3)

0 4 5

What components should the actions after 2020 most focus on?

Metadata

Data harmonisation

Network services

Data sharing and availability

Monitoring

Feedback on the scope of the work area 1 "Towards a common implementation landing zone" (3/3)

0 4 5

What concrete activities should be prioritised for Area of Work 1 of the MIG Work Programme?

(1/2)

Define maturity levels and landing zone expectations

Prioritisation methodology and selection of core INSPIRE data sets

Remove the need for INSPIRE-specific extensions / simplify INSPIRE requirements

Additional guidance/good practices for emerging standards and technologies (e.g. APIs, encodings)

Feedback on the scope of the work area 1 "Towards a common implementation landing zone" (3/3)

0 4 5

What concrete activities should be prioritised for Area of Work 1 of the MIG Work Programme?

(2/2)

Link national geoportals to the INSPIRE Geoportal

Maintain & update INSPIRE central components (Geoportal, Validator, Registry)

Theme specific issues & exchange of implementation experiences in thematic domains

Feedback on the scope of the work area 2 "A digital ecosystem for the environment and sustainability" (1/6)

0 2 4

Is the scope of the work area clear

no - there are too many open issues

yes - but we need substantial clarification

yes - but we need some clarification

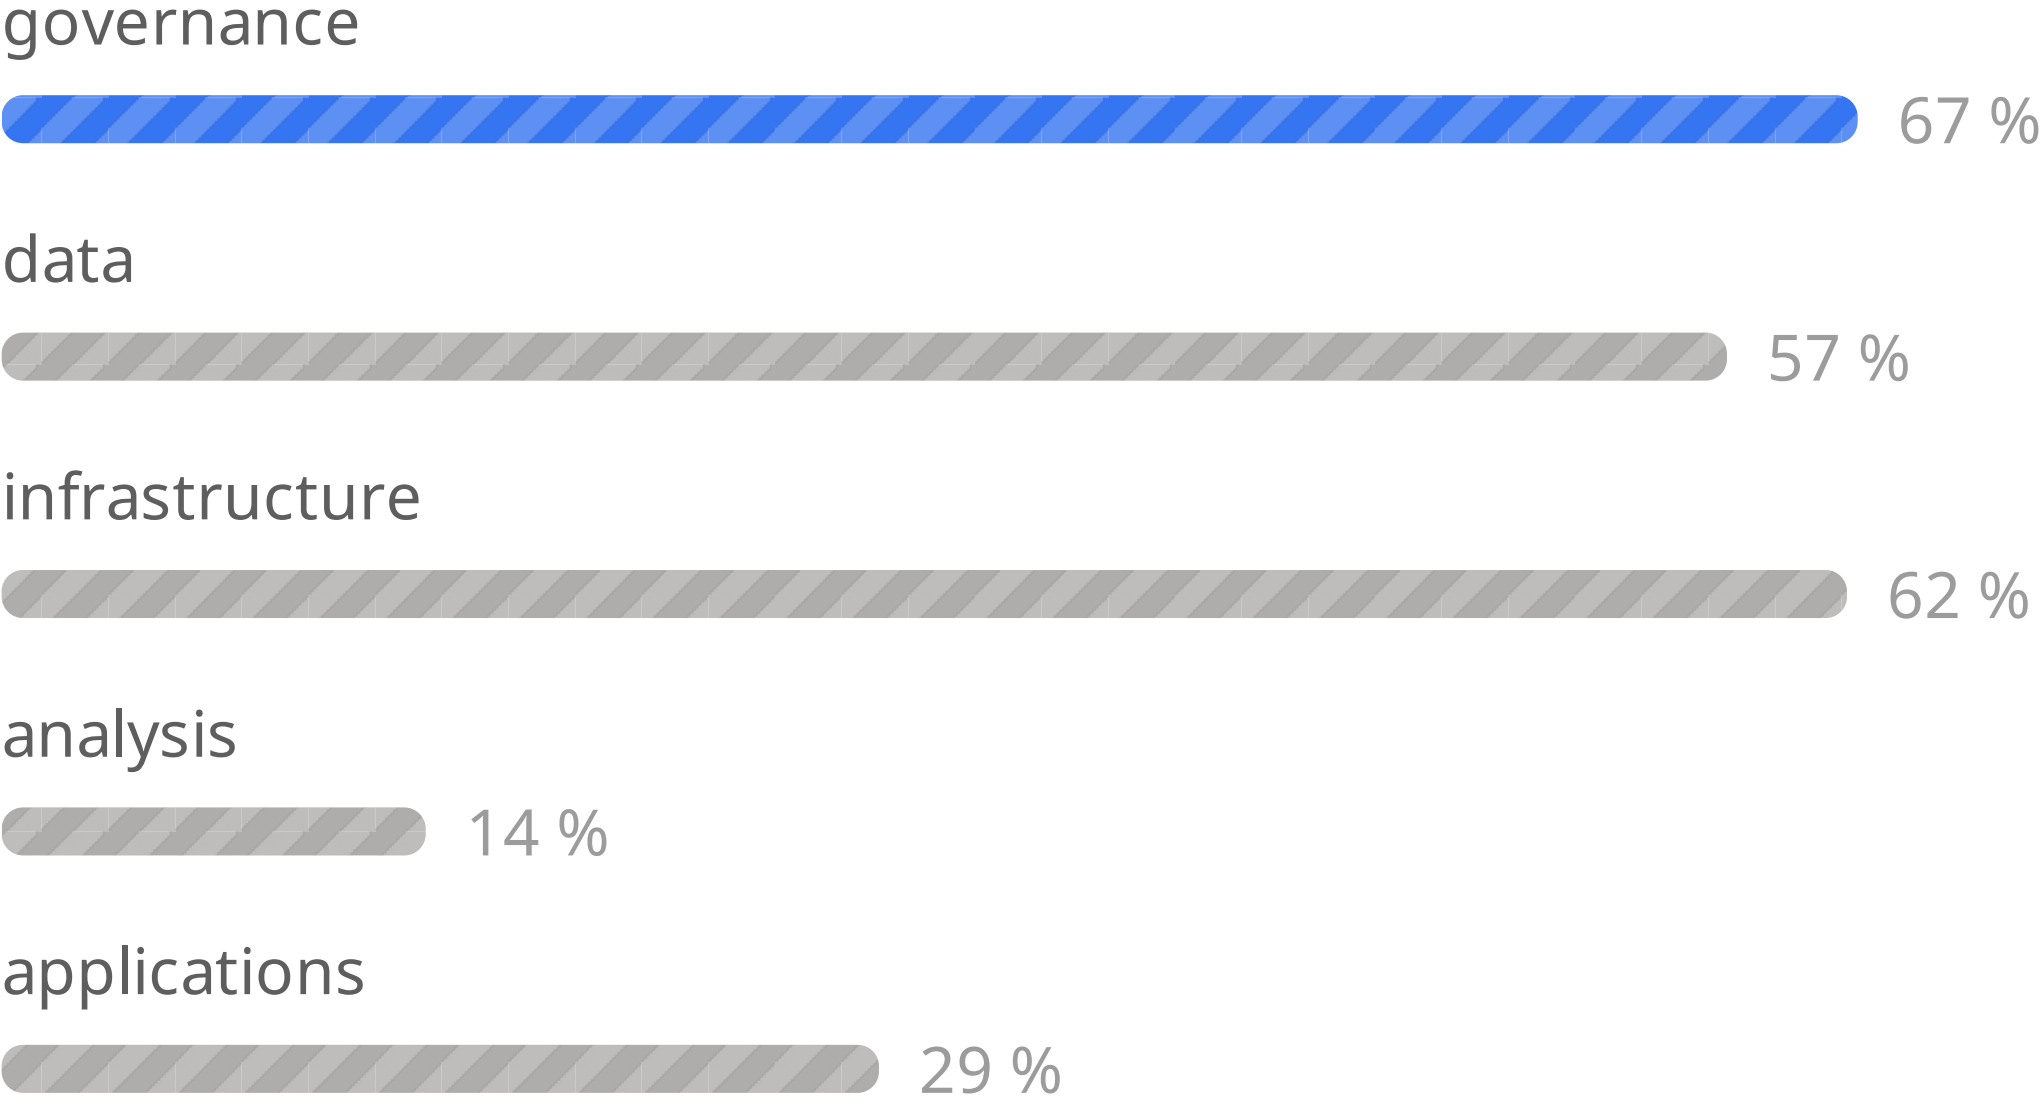

yes, rather clear

Feedback on the scope of the work area 2 "A digital ecosystem for the environment and sustainability" (2/6)

0 2 1

Which building blocks need more information

Feedback on the scope of the work area 2 "A digital ecosystem for the environment and sustainability" (3/6)

0 2 3

Have you got a plan in your country to include future INSPIRE work in your digitisation agenda?

No - not at all

Yes, but only partially

Yes, in a way that could fit the EU activities

Feedback on the scope of the work area 2 "A digital ecosystem for the environment and sustainability" (4/6)

003

Where do your national plans differ from the activities outlined in this work programme?

- More time is needed for this answer. I have to consult my colleagues.
- Ireland is working to improve its position with Inspire compliance
- No swift answer

Feedback on the scope of the work area 2 "A digital ecosystem for the environment and sustainability" (5/6)

0 0 4

Please provide short key recommendations where improvements for work area 2 are most needed.

- Sorry need more time for this.
- - Several actions are included/covered by INSPIRE -> need better link/integration - MIG contribution
- Resources and legislation assigned to inspire in member state
- No swift answer

Feedback on the scope of the work area 2 "A digital ecosystem for the environment and sustainability" (6/6)

005

What finds your highest interest in work area 2 of this common work programme?

- Sorry need more time for this.
- Need more time
- It is all interesting but working towards api is of highest interest
- 2020.2.2
- No swift answer

General chapters and feedback on the scope of work area 3 (1/3)

0 4 0

Since the involvement of the MIG in Area of Work 3 (GreenData4All) is limited, it would be better to remove this task from the work programme.

I agree.

I don't agree. The MIG can still play a role as an advisory body.

I don't have an opinion.

General chapters and feedback on the scope of work area 3 (2/3)

0 4 0

Should the WP also include other related activities (e.g. Reportnet, Copernicus ...) as recorded in "3.4 Other activities" & the Annex 2?

No, let's stick to the core activities.

Yes, for information.

I don't have an opinion.

General chapters and feedback on the scope of work area 3 (3/3)

0 4 0

Stakeholder engagement: should we reach out to other communities and take their concerns and needs into consideration?

No, this is a moving target that will distract us from our own implementation objectives. We should stick to the legal obligations.

 5 %

Yes, it is essential to build a spatial data infrastructure that is fit for purpose across different domains.

 80 %

I don't have an opinion.

 15 %
