### The next generation for e-Reporting environmental and climate data

Reportnet 3.0 is the new e-Reporting platform for reporting environmental and climate data to the European Environment Agency (EEA). The platform embraces the strategic goals of the European Commission's Green Deal and Digital Strategy and will host reporting tasks on behalf of EEA and the Commission.

The transition of reporting obligations from Reportnet 2.0 to Reportnet 3.0 will take a number of years. Therefore, Reportnet 2.0 will remain operational until all data flows are migrated and will then become an archive.

Reportnet 2.0 can be accessed here: <http://cdr.elonet.europa.eu/>

# Reportnet 3.0 functions at end of 2020

Note: Functions are available according to user type and access rights

# Development 2021 - Extending core functionalities

- Continued developments
- Finalise spatial data support; more delivery/harvesting options
- Add feasibility studies (e.g. on Copernicus and near real time data)
- Second half 2021, scale down development capacity.
