Migration of INSPIRE schemas to HTTPS

- All INSPIRE resources have been recently moved under a reverse proxy that redirects them from HTTP to HTTPS with the exception of INSPIRE schemas:
  - http://inspire.ec.europa.eu/schemas, http://inspire.ec.europa.eu/draft-schema
  - many software tools are not able to handle the HTTP → HTTPS redirection!

- Timeline & next steps:
  - create a copy of the schema repositories under HTTPS (incl. imported schemas)
  - inform the INSPIRE community to use the new HTTPS schemas
  - keep also HTTP schemas usable for a transition period (6-12 months)
    - add a warning in the tools (e.g. in the Validator) if HTTP schemas are still used
  - remove schema repositories under HTTP
