

Release note

eProcurement
eContracting

The new release introduces the following improvements:

Notification when contract implementation starts	1
Deliverables submission improvements	1
Multiple files and additional formats allowed.....	1
Deliverables submission screen improvements	2

Notification when contract implementation starts

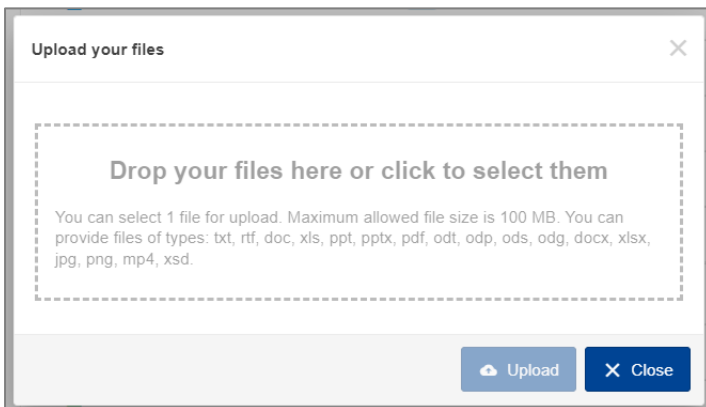

The Primary Coordinator Contact/Coordinator Contacts for the specific contract receive now notification from the F&T Portal when the contracting authority sets the effective start date after contract signature, i.e. the date when the implementation of the contract can start. If the implementation of the contract starts immediately after the last party signs, no separate notification is sent apart from the notification that the specific contract has been signed by the EU and is now in force.

Deliverables submission improvements

Multiple files and additional formats allowed

You can now submit multiple files in various formats (txt, rtf, doc, xls, ppt, pptx, pdf, odt, odp, ods, odg, docx, xlsx, jpg, png, mp4, xsd) under the same deliverable (previously, it was possible to submit only one file per deliverable). The maximum file size is still 100MB.

Please note that compressed files (Zip, 7zip... formats) are no longer supported!

Deliverables submission screen improvements

The history of deliverables submission, revision and acceptance can be now followed directly from the **Deliverable Submission** screen:

- The column *Important date* shows the date of the latest action concerning the deliverable: submission, request for revision or acceptance.
- The submission details show explicitly the *Acceptance date* and *Last submission date*.

Deliverable Submission

Contract number 300048089 Contract title Pie pieces BEACON

Deliverable Submission

Number	Deliverable	Due Date	Important date	Status
D.1	Documentation	2024-04-25	2024-04-30	Accepted

Language: English
Type: Progress report

Last submission date: 2024-04-29
Acceptance date: 2024-04-30

- To better identify the different deliverables versions and requests for revisions, each attachment of a deliverable or a request for revision has its title prefixed with “version” and a sequential number.

version-2 - Report revision 1 Part 3.docx EN	Last updated 29/04/2024	Actions
