- Also active as SMS expert and safety manager for ICT projects
- Subgroup member since 2015

15-6-2018

Update PRIME subgroup safety culture

2

# Safety Culture

## History

- PRIME subgroup started in 2014
  - Network Rail chairman u/i 2017
  - ProRail chairman as of 2018
- 10-15 active members
- Initial goals:
  - Exchange of knowledge and best practices
  - Development of models and KPI's on near miss and safety conversations, eventually: European benchmark
- 2017: Twinning Program

## Overall lessons from twinning program 2017

1. Many best practices and learning points for improvement per organization
  - No one size fits all, often need for tailoring
2. European IM's are different and hard to compare on safety culture
  - Different context: national culture, role NSA, role prosecutors, role government
  - Different organizations: culture, structure, responsibility for safety (line/staff), role and position of safety department
  - Different interfaces: contractors and railway undertakings
3. We can use models to measure safety culture per organization, but
  - We have no shared language, perception and definitions
  - Best to monitor development per organization, not to compare

# Safety Culture

## Subgroup goals for 2018 and further

- Exchange knowledge and best practices
  - On measuring safety culture
  - On improving safety culture
- Support and organize in-depth learning from other organizations
- Meet 3x per year, make separate bilateral appointments

# Safety Culture

## Main topics subgroup 2018 and further

1. Safety leadership (RSSB, Network Rail)
2. Promoting a learning culture, learn from things that went well (Infrabel, ProRail)
3. Rules (Infrabel, Irish Rail)
4. Serious gaming (ProRail, i.c.w. EUAR)
5. Twinning program 2019
