

Reportnet 3 - Modernising e-Reporting

Status and next steps

Status 2022

- Reportnet 3.0 developments concluded under the 1st Framework contract in summer 2022
- Operational system available at <https://reportnet.europa.eu/>
- Project end report to be published soon
- Main spatial dataflows in 2022
 - noise sources and strategic noise maps
- Key challenges in 2022
 - Transition to new contractor
 - Handling of large dataflows in particular on CO2 emissions from new cars and vans

New work towards 2023

New Framework contract in place as of summer 2022

Key functionalities to be developed in the first year under the new contract:

1. Improvements to existing functionality

- Enhance public page information, user notifications and dataflow help
- Improve error handling for file import
- Increase functionality around spatial data handling
- Extend API to handle more functions for system-to-system interaction
- Improvement in system architecture to handle large datasets

2. New developments

- Reporting Obligations Database (ROD) integration
- New functionalities as new dataflows arrive on the platform
- Better handle sensitive data requirements
