

Workshop on Data Ecosystems and SDI – facilitators for data value creation

Workshop in collaboration with:

- EuroSDR
- KU Leuven
- TU Delft
- IGN France
- DAFAGO (dk private sector network)

Event

Copenhagen 12th and 13th of December

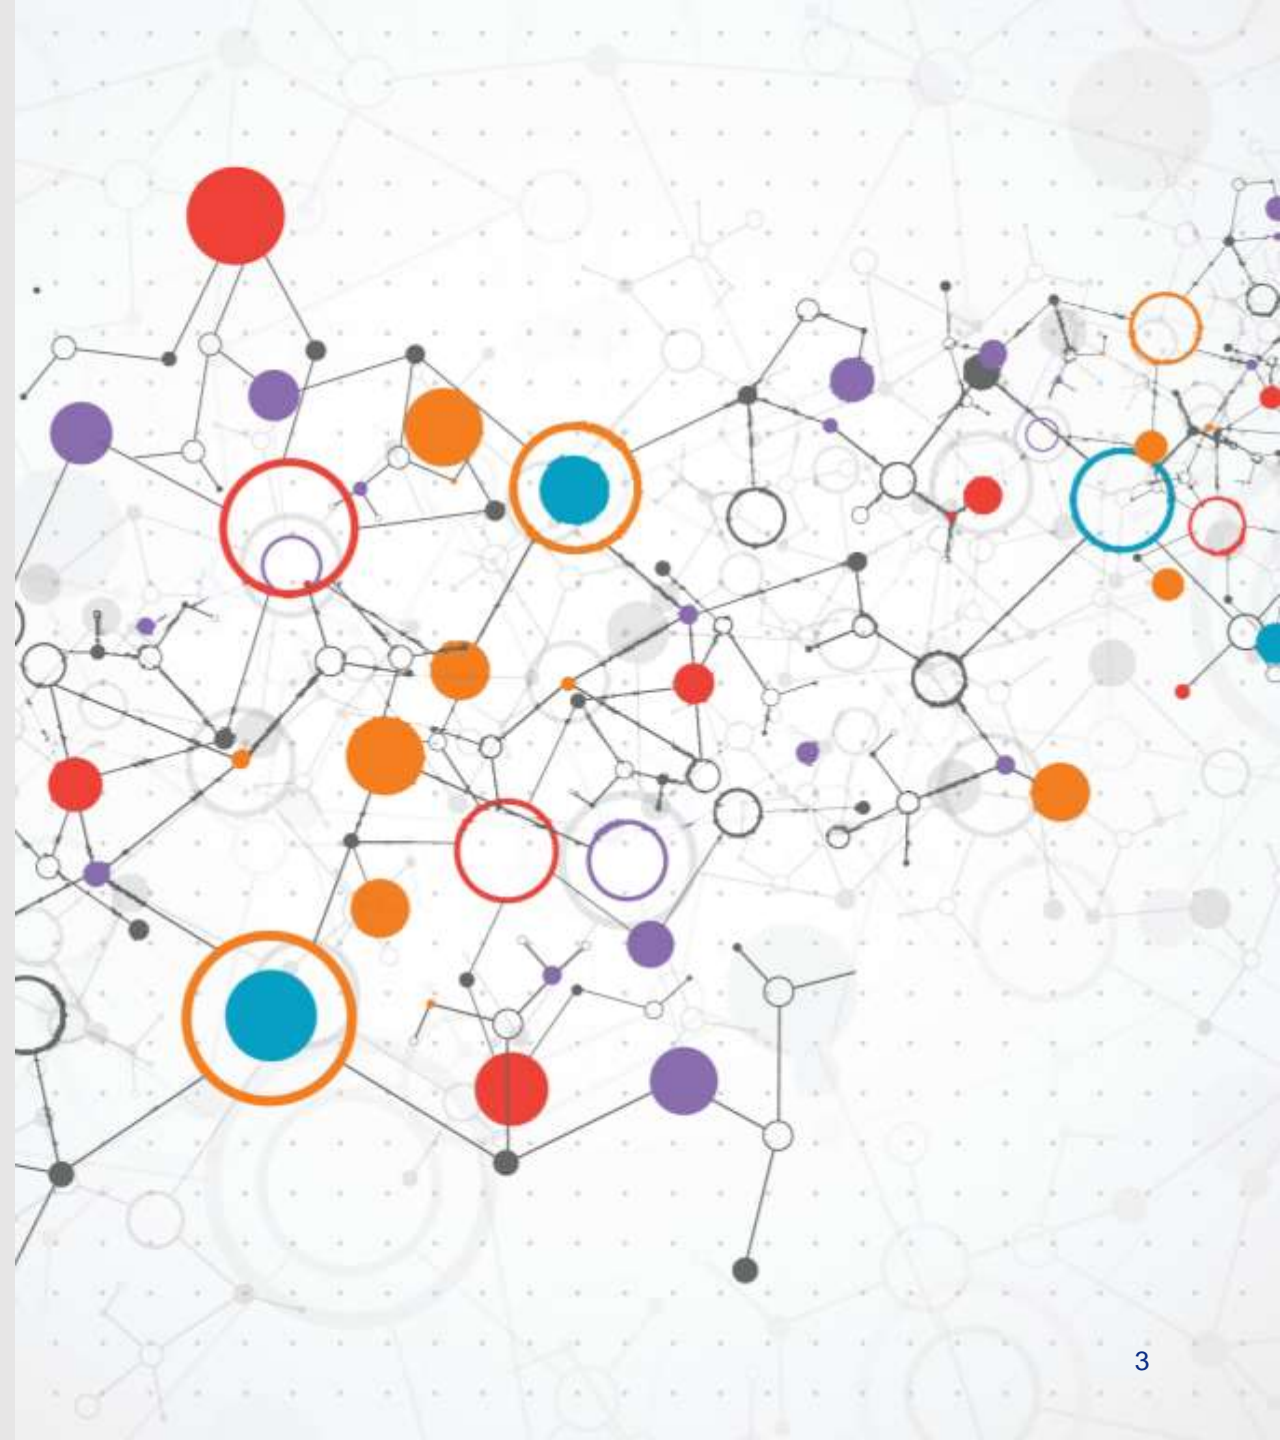

Lunch to lunch format

Call for abstracts until

15/09/2023 to eurossdr@kuleuven.be

Read more about call for abstract:

<http://www.eurossdr.net/news/call-abstracts-data-ecosystems-and-spatial-data-infrastructure-%E2%80%93-facilitators-data-value>

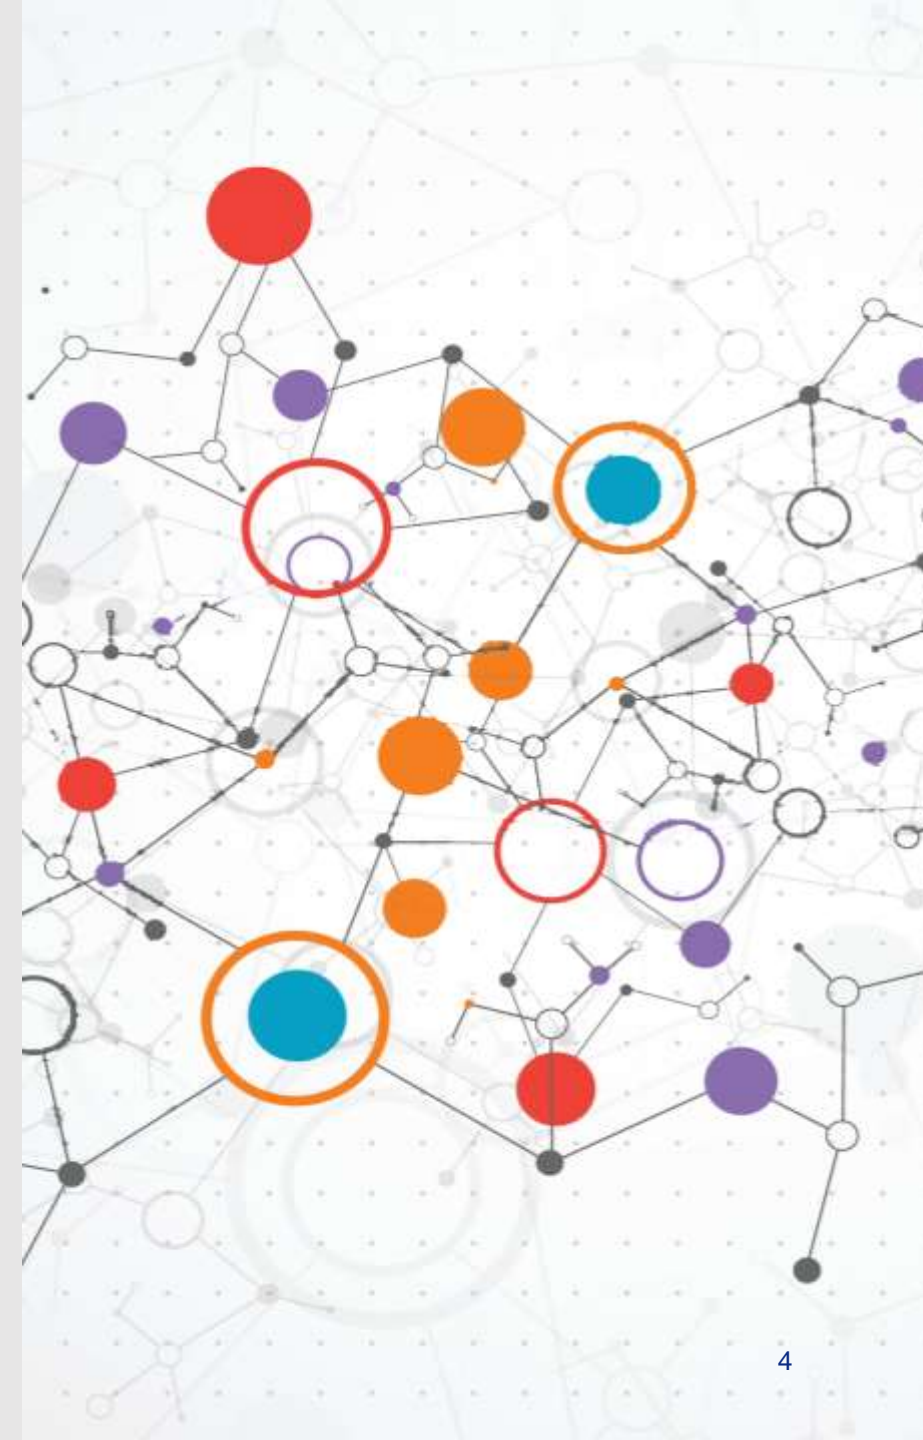

Why this workshop?

Data ecosystems are important environments, facilitating the collection, analyzing and dissemination of data

Data ecosystems play a key role in creating value of the spatial data managed in the SDI

The workshop aims at providing insights in data ecosystems in the context of spatial data infrastructure (SDI) identifying:

- concepts and challenges to uncover
- relevant research topics
- encouraging development of best practice recommendations
- spur collaboration on use cases across domains and sectors

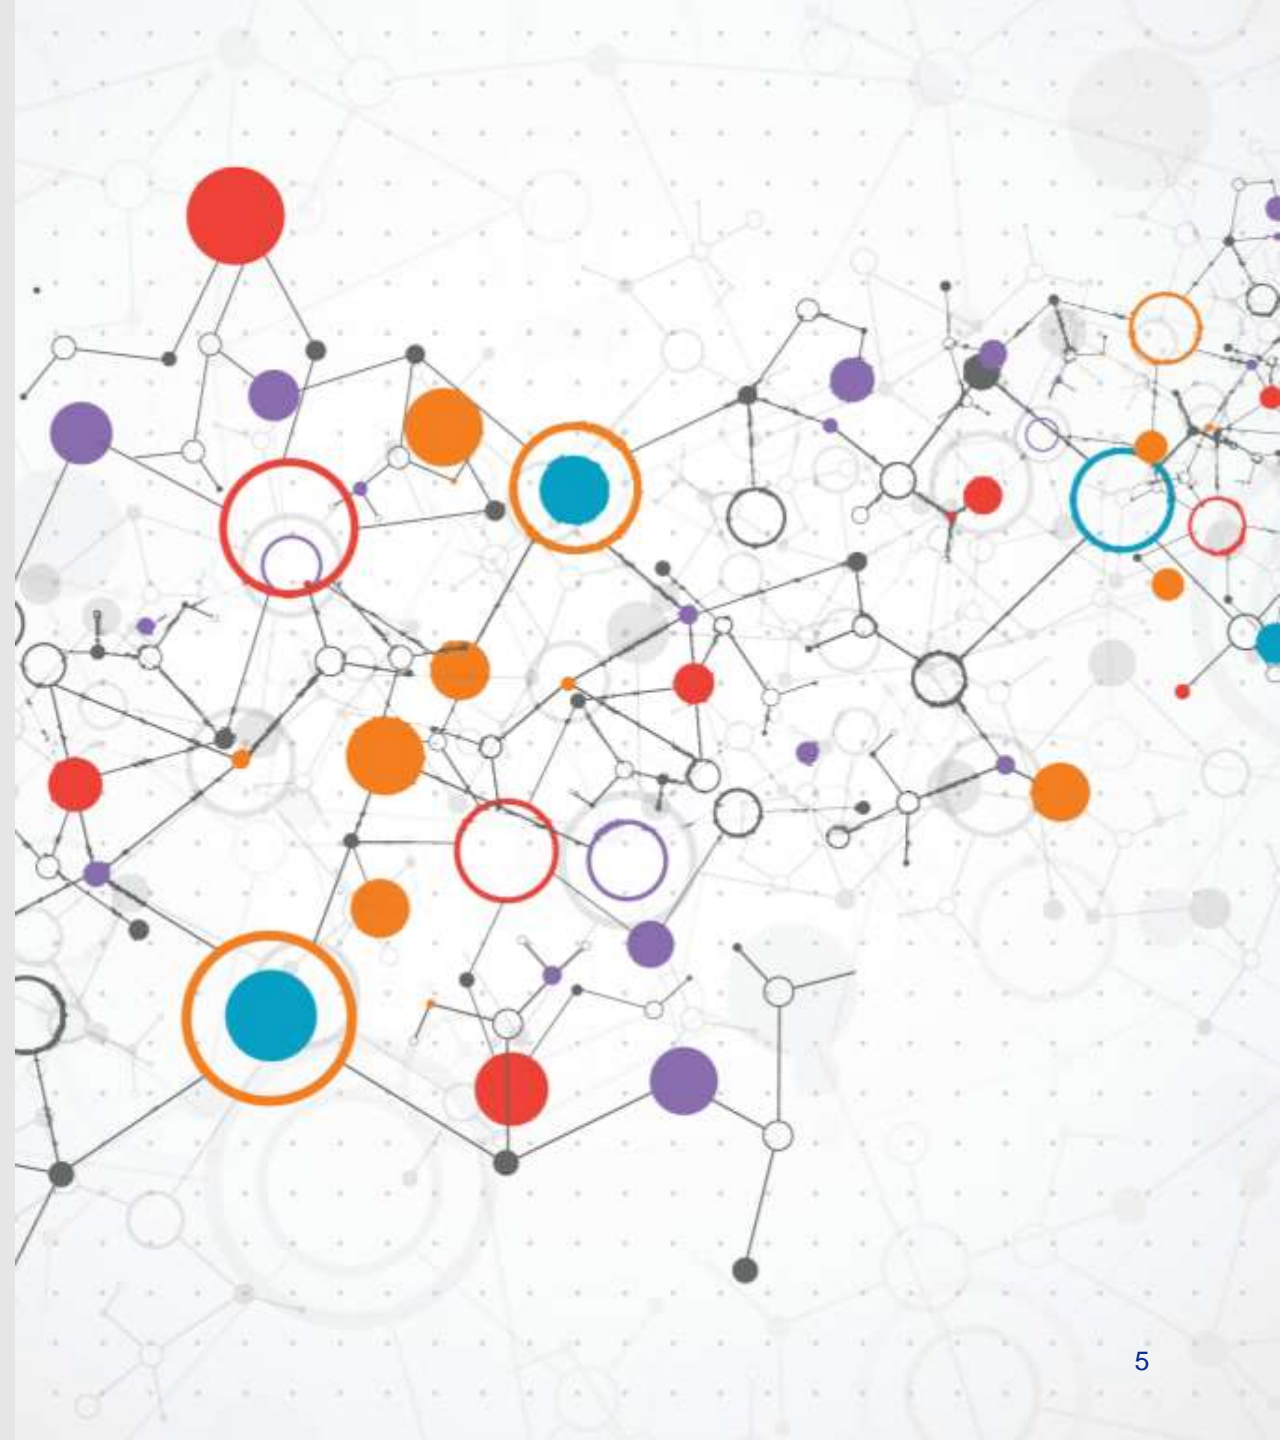

Call for Abstracts

Content might address:

- The role that SDI might play in future value creation
- How data ecosystems can contribute to a demand driven approach to data creation, maintenance, and dissemination
- How to secure value for all participants in the ecosystem (commercial, government, scientific, citizen)
- How to create strong incentives – Business- and Financial Models
- Governance mechanisms to strengthen data circulation in the ecosystem?
- Any other topic somehow related to the topic is more than welcome

The abstracts will be published in the indexed Official Publication Series of EuroSDR.

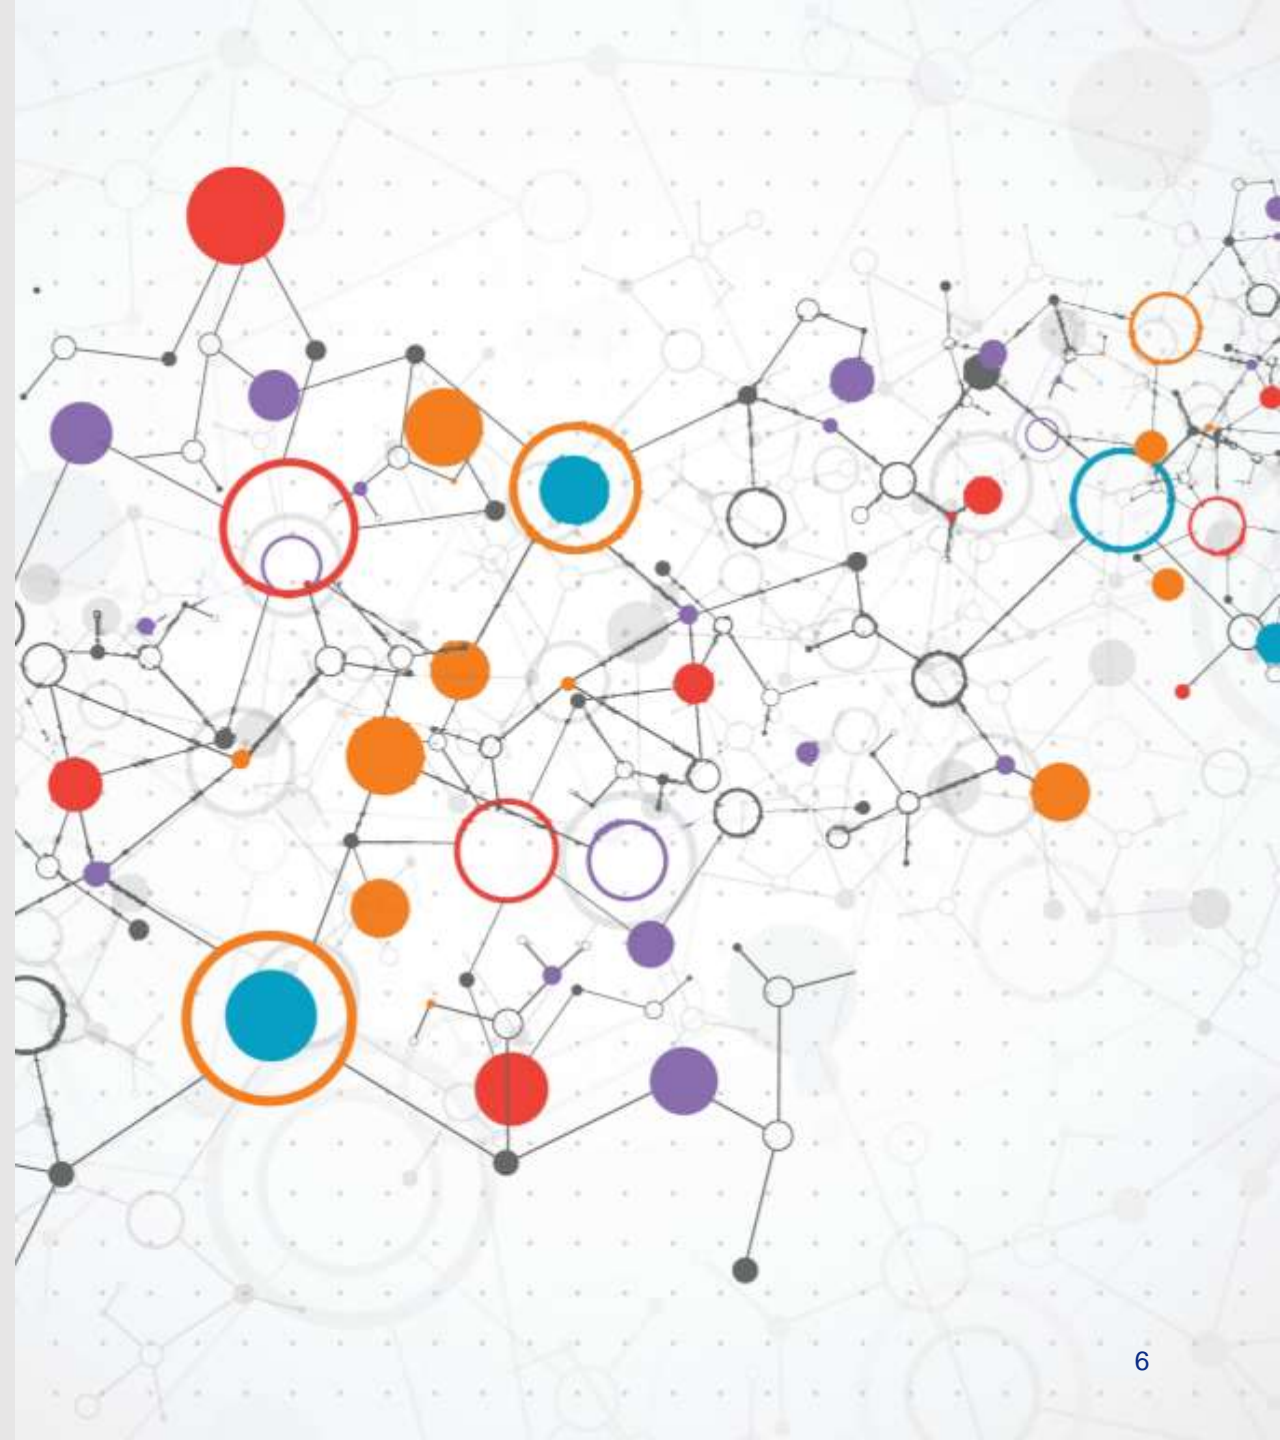

Workshop format

Limited numbers of participants – 25

Short presentations and time for:

- deep dives into specific issues
- Discussions, networking and knowledge exchange

A summary report with findings, presentations and potential research topics will be drafted after the WS

Workshop

Registration opens in September
