01. Corporate solutions

Definition

Corporate solutions are IT solutions devised by the European Commission.

Rules

> ⊘ When available, corporate solutions must be used for the development of European Commission websites.

Corporate solutions on offer

Europa Web Publishing Platform

Europa Web Publishing Platform is the-state-of-the-art web publishing platform for building European Commission websites. It is based on Drupal, benefits from the experience of the NextEuropa CMS and integrates European Commission's rules and legal requirements for its web presence.

Europa Search

Europa Search is the centralised European Commission search engine. It offers search functionalities like a filtered search specifically targeted at covering Commission websites. As a corporate service, the use of Europa Search is aligned with the respective Web Guide rules on third-party tools implementation, data protection, and accessibility.

Europa Analytics

Europa Analytics allows you to track, analyse and better understand your website audience. This is crucial to ensure online communication is targeted, compliant with EU data protection rules and cost-efficient. This corporate service is currently based on the open source tool Matomo/Piwik, customised for specific European Commission business needs.

Europa Webtools

Europa Webtools provides interactive features on European Commission websites through its tailored portfolio of high-end, corporate tools and interactive services. All webtools meet the necessary accessibility and data protection requirements.

Europa video player

Europa video player is the mandatory corporate tool for playing video clips on European Commission websites. It provides ease of integration and works on any device and browsing platform.

SCIC events database

You must always register corporate events in the Events Database managed by DG Interpretation (SCIC), the department responsible for interpretation and organisation of conferences in the Commission. Once registered, you can also request to benefit from the SCIC framework contract with events service providers.

EUSurvey

EUSurvey is the mandatory corporate tool for creating and conducting multilingual surveys and public consultations. It covers all steps in a survey lifecycle, from the design and launch of the survey to the analysis and publication of results. EUSurvey can collect stakeholders' views on a specific issue, consult businesses, citizens, and other parties, and measure user satisfaction.

Web streaming

Run and managed by DG Interpretation (SCIC), the webcast portal (http://webcast.ec.europa.eu) provides a one-stop shop webstreaming service for the European Commission.

EU Login

EU Login is the European Commission's central user authentication service limiting access to websites, applications or services to authenticated users. It works on a sign-in based on the user's email address and password.

EU CAPTCHA

CAPTCHAs are tools used to differentiate real users from automated ones. EU CAPTCHA is a service managed by the European Commission and is available in the EU's 24 official languages.
