05. We welcome your feedback

The Europa Web Guide is a living document that evolves at the same time as the rules are set up and follows the industry standards in its principles.

We also need all users to provide feedback and report on issues to make sure the guide is the most up-to-date possible:

- you come across a section where you think users would benefit from more explanation,
- your services are described in the web guide but there has been some new developments and the guide needs some update,
- you are looking for some information that you cannot find in the guide,
- you have a question...

Thank you for emailing Comm Europa Management with your comments/questions as well as the link to the section that triggered your email.

the Europa Web Guide Team will be in touch with you in a timely manner.
