

# SDW-4: Discovery of spatial data through mainstream search engines

This space covers the ad-hoc MIG-T action SDW-4 on Discovery of spatial data through mainstream search engines, agreed in the [48th MIG-T meeting](#).

See the [intro](#) and [conclusion](#) slides from the initial MIG-T discussion for further information on the scope of the action.

At the INSPIRE Conference 2018, a [workshop on Google Dataset Search](#) was organised.

On 3-4 July 2019, a **Workshop on making spatial data discoverable through mainstream search engines** ([programme](#), [call for abstracts](#)) took place at JRC.
