Testing INSPIRE registry RC6

We are happy to announce a new candidate release of the INSPIRE registry and registers. The new candidate release contains two additional registers with the layers and enumerations defined in the INSPIRE implementing rules on interoperability of spatial data sets and services as well as an updated HTML user interface.

Before officially publishing these, we would like to invite you to participate in the testing of both the content and new user interface of the service.

Instructions for testing as well as the draft documentation for the new INSPIRE registry service are available in a specific sub-project in the MIG collaboration space.

The testing will run **until Monday, 30 November 2015**.

Getting involved

If you are interested in testing new release candidates of the software or service, please register in the MIG collaboration space and send an e-mail to inspire-registry-dev@jrc.ec.europa.eu.

Questions, issues for discussions, bugs and suggestions for new features can be submitted in the issue tracker. Note that in order to submit new issues, you have to be signed into the collaboration space and have been assigned to the testing project. Please also check the existing issues before submitting a new issue.

Thanks in advance for helping us improve the INSPIRE registry and registers as well as the Re3gistry software.

Best regards,
The JRC Registry Team
