Manage views

Why are views interesting?

Views are a way to save altogether:

- The code of the dataset to which the view applies;
- The settings currently selected in the **Selection** tab;
- The format options currently selected in the **Format** tab;
- The current sorting parameters.

You can thus use views to visualize your data in the same way, at a later stage.

How to create/save views?

Click on the save icon to save the selected view options as a "custom view":

Then set the custom view name, which is mandatory:

Save visualisation settings as ...

Settings name :

Warning: saved visualisation settings are stored locally in the web browser storage.
Saved visualisation settings may be lost in case the browsing data is cleaned up.

In case you refused the Data Browser cookies, when clicking on "Save view" the window is displayed:

Save visualisation settings as ...

Settings name :

Warning: saved visualisation settings are stored locally in the web browser storage.
Saved visualisation settings may be lost in case the browsing data is cleaned up.

CancelSave

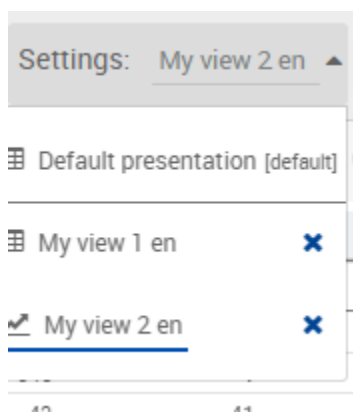

- Click on **Save and accept cookies** button to save the view. This will automatically change the previously selected option to refuse the cookies.
- Click on **I refuse cookies** button to keep the option previously selected. This will close the window and the view will not be saved.
- Click on **Cancel** button to disregard the action.

Saved custom views are stored locally in the web browser storage, and may be lost if the browsing data is cleaned up.

How to load a view?

Use the **Current view** menu above the visualisation area:

- Click on a view to load it
- Click on  to delete the view

Manage bookmarks

Bookmarks are a good way to save a dataset and the selected settings for long-term use.

To generate a bookmark, click

The following popup appears:

Bookmark link

https://webgate.acceptance.ec.europa.eu/eurostat/databrowser/bookmark/7f6b87ce-03af-4c54-b71a-7486710d9e2a?lang=en
