

How to zoom and pan the graphics

Zooming features are available in the following visualisations:

- **Line** visualisation:

- **X-Axis zoom:** Click on a specific area of the line chart and drag to the right or to the left until the relevant point to zoom on a specific area, then drop the mouse button:

Click on to get back to the default X-Axis zoom level.

- **Y-Axis zoom:** Use the zoom selector located at the top right of the Line chart:

Y Axis zoom level: 1x

A horizontal slider control with a blue circular knob positioned at the left end, labeled '1x'.

Moving this selector to the right direction increases the Y-Axis zoom level (up to 4x). When the zoom level is increased, a vertical scrollbar appears. This scrollbar provides the vertical movement throughout the zoomed line chart.

- **Bar** visualisation:

- **X-Axis zoom:** Click on a specific area of the bar chart and drag to the right or to the left until the relevant point to zoom on a specific area, then drop the mouse button:

Click on to get back to the default zoom level.

- **Map** visualisation:

- **Mouse zoom:** Using the mouse wheel, the user can increase or decrease the current zoom level.
- **Zoom buttons:**
 -  button increases the current zoom level.

-  button decreases the current zoom level.

Click on  to get back to the default zoom level and default visualisation position of the map.
